number is the number of the volume in which the paper appeared; the second number is the number of the paper in the volume. For abstracts, which are not assigned a paper number, the identifying abbreviation AB is given; i.e., (87-AB). The month and year indicate the issue in which the material appeared. Page numbers indicate the first page of the item.

Discussion is identified as "Disc." and is indexed under the paper title and the name of each contributor to the discussion. Only discussion which appears in V. 87 is covered in this index. To find discussion of a paper, check the notice given in the issue in which the paper appeared. This notice will indicate where any discussion that developed is published. A similar notice is given with the abstracts of symposia publications. Discussion of symposia papers usually appears one year following publication of the abstract.
